MID:	153891						

A.3 Scan status			
Date scan completed	June 25, 2024	Scan expiration date (90 days from date scan completed)	September 24, 2024
Compliance status:	PASS	Scan report type	Full Scan
Number of unique in-scope components ⁴ scanned			10
Number of identified failing vulnerabilities			0
Number of components found by ASV but not scanned because scan customer confirmed components were out of scope			4

⁴ A Components includes any host, virtual host, IP address, FQDN or unique vector into a system or cardholder data environment.

A.4 Scan Customer Attestation

BookingCenter LLC attests on June 28, 2024 that this scan (either by itself or combined with multiple, partial or failed scans/rescans, as indicated in the above Section A.3 "Scan Status") includes all components which should be in scope for PCI DSS, any component considered out-of-scope for this scan is properly segmented from my cardholder data environment, and any evidence submitted to the ASV to resolve scan exceptions--including compensating controls if applicable--is accurate and complete. BookingCenter LLC also acknowledges the following:

1. accurate and complete scoping of this external scan is my responsibility, and
2. this scan result only indicates whether or not my scanned systems are compliant with the external vulnerability scan requirement of PCI DSS; this scan result does not represent my overall compliance status with PCI DSS or provide any indication of compliance with other PCI DSS requirements.

A.5 ASV Attestation

This scan and report was prepared and conducted by Sysnet under certificate number 5091-01-07, according to internal processes that meet PCI DSS requirement 11.2.2 and the ASV Program Guide. Sysnet attests that the PCI DSS scan process was followed, including a manual or automated Quality Assurance process with customer boarding and scoping practices, review of results for anomalies, and review and correction of 1) disputed or incomplete results, 2) false positives, 3) compensating controls (if applicable), and 4) active scan interference. This report and any exceptions were reviewed by christopher perthel
